

# SURREY HILLS BIKES

WINTER 2016

Book a service now and save up to 20%

On services in December, January and February

## AVOID RUST AND MECHANICALS

### SERVICE NOW TO PROTECT YOUR PRIDE AND JOY

Winter is finally knocking on our door! Whether you're a 'hang it up till spring' or a 'ride it through all weathers' kind of person, now is the perfect time to make sure your bike is serviced properly.

#### Fair Weather Riders

For bikes lying dormant over the colder months, rust can easily take hold. Bearings, cables and chains pick up moisture and dirt through summer and once static, simply start to seize up, making replacement parts more likely when you come to use it again. Servicing now can address this risk; With components inspected, cleaned and winterised, it's ready to go when the weather improves.

#### Winter Riders

For those riding through the elements servicing can be critical. Winter slop and salt, whether on trail or road, will play havoc with components and decimates them quickly with chains, cassettes, bearings and brakes are all susceptible to moisture and failure.

If you are riding trails, a well tuned bike is even more important. Properly maintained suspension and pivots will help provide maximum traction over slippery surfaces, helping you to stay 'right side up' and grinning through the cold.

Please remember nobody likes a mechanical at any time, especially in the cold, wet and dark.

#### Early Bird Discount

Book by 20<sup>th</sup> December for a service in December, January or February and receive up to 20% discount.

1 bike: 10% discount  
2 bikes 20% discount \*
